- Cryptocurrency live portfolio tracking management.
- A universal mobile app that allows people to buy goods and services with crypto coins or tokens.
- A smart AI exchange for tokens
- NFT Market place and Portfolio tracking management
- Play to Earn revolution

SCORPFIN

Key problems that Scorpion Finance is addressing

Cryptocurrency users are forced to use fragmented and disconnected services to access the full possibilities of blockchain technology. Incumbent crypto currency wallet solutions offer limited functionality and fail to encompass the broad possibilities of real technology. Some of the simplest applications of cryptocurrency are restricted. There are few options for cryptocurrency users to spend their assets with merchants. The current state of the cryptocurrency market comprises numerous participants' viz. investors, traders, lenders, borrowers, and arbitrageurs among others. They exchange hands to the tune of billion dollars worth of digital assets in custodial & non-custodial markets. In this paper, we introduce a decentralized system for the frictionless payment, swap, borrowing of digital assets & NFT to tackle the short comings of existing systems, making money markets efficient, and creating higher-yield bearing opportunities. Therefore, we intend to offer such financial products that have a direct impact on the user's real life. Scorpion finance helps you make the most out of your Crypto in different ways

The New Revolution

Scorpion Finance is positioning itself to be the most comprehensive and versatile wallet solution, swap solution, portfolio tracker & NFT asset tracker for cryptocurrency users. There is rising demand for both self-hosted wallet solutions and access to diverse solutions. ScorpFin encompasses the qualities of a secure self-hosted wallet, a DEX, a merchant payment network, and a DeFi services aggregator within a single application. Grounded in a frictionless UX and robust security, ScorpFin aims to be the leading wallet solution for cryptocurrency veterans and newcomers alike.

The ScorpFin team will initially roll out the ScorpFolio and a sophisticated wallet solution that facilitates rarely seen features like NFT storage and display in future. In future releases, cross-chain atomic swaps, a merchant payment network, and the ability to link with DeFi solutions will all be integrated. Every feature is subject to a rigorous

testing process before being implemented to ensure maximam security.

SCORPFIN

ScorpFolio (Live portfolio tracker)

SCORPFOLIO

The tool to make traders' lives easier.

ScorpFolio aims to be the leading network for mobile cryptocurrency portfolio tracking management.

As a solution, ScorpFolio offers web and mobile application where you can overview and customize your wallet assets portfolio.

ScorpFolio will be the most complete crypto app, within the latest prices for over 8000 cryptocurrencies, important news and direct updates from project teams.

ScorpFolio takes a user first approach and is committed to provide the best products to help the advancement of the decentralized movement & ecosystem.

The market data and information will be freely available for the benefit of the ecosystem on ScorpFolio.

We have successfully tested our application tool to analyze any wallet with BEP20 tokens:

- No of assets on the BSC wallet Addresses
- Automatically distinguish between active and dead tokens
- Overview of total wallets gains and losses
- Overview of assets withdrawals
- Custom live price updates
- Custom live wallet update
- Custom alert's for tokens price action
- View assets value in desired currency (default USD)

Master tools that will be available soon:

- Etherscan wallet
- Polyscan wallet
- Whales wallet tracker
- New token listings

ScorPay

Replacing money in our daily life.

ScorpFin (ScorPay) is a universal mobile app that allows people to buy goods and services with crypto coins or tokens.

Several cryptocurrency projects have tried and failed to implement merchant gateways that enable businesses to accept and settle cryptocurrency payments. ScorpFin has identified the common barriers faced to implementing such solutions and has built a dedicated team that will build a merchant network of over 500,000 businesses. In addition to the ability to store, send, receive, and exchange, ScorpFin users will have unprecedented opportunities to spend their cryptocurrency assets.

We are based in the United Kingdom. Our initial goal is to gain support from the local shops and then push it provincially and internationally.

Our vision is to one day see everyone who has a mobile phone be comfortable with the crypto world. We live in a system that is set up to fail. If everyone goes to the bank at the same time to withdraw their money, the banks will all crash immediately.

The reason is that the money that we thought we saved in the bank doesn't physically exist. The bank consistently lends out our money to corporations/enterprises to earn more money.

The bank is the core source of fraud and debt.

Cryptocurrency is set up to succeed. The decentralized feature makes the Transactions transparent.

The Public and Private Key hash system makes it so that everyone is anonymous. There's zero concern about privacy or personal data

Because we are just a serial number in the crypto world, the money you have in your crypto portfolio is exactly the money you own. We should migrate to a system that is community-driven and fair to everyone on this planet Earth.

We understand the migration is a tough task especially for the newcomer, therefore, we would like to start with the small transactions, the purchase that we make almost daily, the coffee or bubble tea! After launch, we will continue finding different business types for partnership. In the end, everyone will evolve into the crypto world and say goodbye to the unfair/flawed system created by boomers.

Problem Statement

Currently, we don't have a solution to bridge the crypto world and the real world. Many of us have cryptocurrencies in our crypto wallets, we should be able to spend the crypto money on our daily needs.

Proposed Solution

- ScorpFin solution solves the gap between the crypto world and the real world.
- ScorpFin is the master of integration; it connects Binance network, Ethereum network, and other popular blockchain networks that will be added in the future.
- ScorpFin accepts the top 100 crypto coins or tokens, the app is smart enough to filter through your wallet and subtract the appropriate balance from your Crypto wallet.

What benefit do you gain as a customer?

- You can make a purchase with any crypto coin or token as long as it's on the top 100 trading list.
- The transaction takes place in the crypto world, you don't need to transfer crypto to your bank account, meaning no extra fee!
- All you need to do is open the ScorpFin app, scan the QR code that the shop owner issues, confirm the transaction details, and then you are good to go!

What benefit do you gain as a shop owner?

- Fast customer throughput.
- You will become one of the advanced business owners that accepts cryptocurrency.
- People are going to talk about you and that will bring a lot of attention and profit to your business.

ScorpSwap

The Smart AI Exchange

ScorpSwap is a completely different type of exchange that's fully decentralized — meaning it isn't owned and operated by a single entity and uses a relatively new type of trading model called an automated liquidity protocol. The ScorpSwap platform is initially built on top of the BSC Chain, the world's 5th-largest cryptocurrency project by market capitalization, which makes it compatible with all BEP-20 tokens and infrastructure such as wallet services like TrustWallet, MetaMask, ScorpSwap is also completely open source, which means anyone can copy the code to create their own decentralized exchanges. It even allows users to list tokens on the exchange for free. Normal centralized exchanges are profit-driven and charge very high fees to list new coins, so this alone is a notable difference. Because ScorpSwap is a decentralized exchange (DEX), it also means users maintain control of their funds at all times as opposed to a centralized exchange that requires traders to give up control of their private keys so that orders can be logged on an internal database rather than be executed on a blockchain, which is more time consuming and expensive. By retaining control of private keys, it eliminates the risk of losing assets if the exchange is ever hacked.

ScorpSwap will be a core competitor of Uniswap and PancakeSwap.

How ScorpSwap works:-

ScorpSwap runs on two smart contracts; an "Exchange" contract and a "Factory" contract. These are automatic computer programs that are designed to perform specific functions when certain conditions are met.

In this instance, the factory smart contract is used to add new tokens to the platform and the exchange contract facilitates all token swaps or "trades." Any BEP20-based token can be swapped.

How to Use ScorpSwap

Getting started with ScorpSwap is relatively straight forward, however, you will need to make sure you already have a BEP-20 supported wallet setup such as MetaMask, WalletConnect, Coinbase wallet, Portis, or Fortmatic.

Once you have one of those wallets, you need to add BNB to it in order to trade on ScorpSwap and pay for gas — this is what BSC transaction fees are called. Gas payments vary in price depending on how many people are using the network. Most BEP-20 compatible wallet services give you three choices when making a payment over the Binance blockchain: slow, medium and fast. Slow is the cheapest option, fast is the most expensive and medium is somewhere in between. This determines how quickly your transaction is processed by BSC network miners.

ScorpNFTracker & Market

ScorpNFTracker & Market

This application offers a market place for buying, selling and creating non-fungible tokens. ScorpNFTracker is used for real time tracking of your collectibles and historical market sales data of each NFT thus in turn rewarding users with ScorpFin tokens.

The NFT market value tripled in 2020, reaching more than \$250 million. During the second quarter of 2021, NFT sales exceeded \$2 billion. ScorpNFT racker tracks the unique identity and ownership of an NFT which is verifiable via the block chain ledger.

Ownership of the NFT is often associated with a license to use the underlying digital asset, but generally does not confer copyright to the buyer; some agreements only grant a license for personal, non-commercial use, while other licenses also allow commercial use of the underlying digital asset.

A non-fungible token (NFT) is a unit of data stored on a digital ledger, called a block chain, that certifies a digital asset to be unique and therefore not interchangeable. NFTs can be used to represent items such as photos, videos, audio, and other types of digital files. Access to any copy of the original file, however, is not restricted to the buyer of the NFT. While copies of these digital items are available for anyone to obtain, NFTs are tracked on block chains to provide the owner with a proof of ownership that is separate from copyright.

NFTs have become increasingly popular in the early months of 2021 because of recent high-profile sales. Some notable NFT sales in 2021 like NBA Top Shot's video clip of LeBron James selling for \$208,000 on February 22, 3LAU's album bringing in \$11.7 million in sales as of February 28, and digital artist Beeple's piece selling for \$69.3 million on March 11, have made NFTs an especially current topic in popular culture. In March 2021 alone, NFT sales exceeded \$220 million making up nearly half of all-time NFT sales ever at the time.

This renewed interest in NFTs, particularly those in art, music, and sports, have made way into mainstream consciousness, especially amongst the younger generation.

On March 27, 2021 Saturday Night Live episode, cast members satirized this growing niche with a comedy skit on NFTs, which was later sold in the form of an NFT for \$365,000 on April 6, 2021.

Many investors are willing to pay high rates to secure and promote NFTs and continue to do so because they anticipate NFTs to be the biggest and most profitable collectibles in the future. Venture capitalist David Pakman has claimed that the growing value of NFTs is redefining the major entertainment industry as of early 2021. Investors like Mark Cuban have proposed new ways of implementing NFT technology to monetize sports tickets and merchandise sales.

ScorpGames

Play to earn Revolution

A new type of game partially owned and operated by it's Players, Earn Scorpfin tokens by playing and use them to decide the future of the game. This platform is open to everyone, however, by owning ScorpNFTs, players have more chances of completing the stages and ultimately earn more rewards attached to each stage. The NFTs needed will be available for purchase through the marketplace offered by the ecosystem. A lot of work will be on going to keep bringing the perfect versions of this application. Sit tight and enjoy the fun ride!

Tokenomics

Total Supply 100% (100,000,000,000)

CEX 4% (4,000,000,000) Locked

Pancakeswap 26.6% (26,600,000,000)

10% Reflection Reward In BNB

5% of every buy & 5% of every sell is taken and redistributed to all holders in BNB. Hold ScorpFin tokens, earn WBNB.

5% Reflection Reward In ScorpFin

2% of every buy & 3% of every sell is taken and redistributed to all holders in ScorpFin. Hold ScorpFin tokens, earn ScorpFin. Hold ScorpFin to earn more ScorpFin reflection rewards.

Auto Paid Every 60 Minutes

You don't need to claim you're earned BNB & ScorpFin. It's automatically sent to your wallet every 60 minutes.

Hyper-Deflation

2% Auto Buyback & Burn ScorpFin

2% of every sell transaction is transformed into ScorpFin (2%) for auto Buyback & burn. Once the system detects a sell, it will automatically buy back a certain value of tokens & burn which aims to reduce the supply and increasing the value of our tokens.

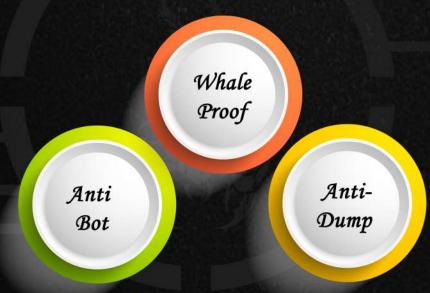

Big Marketing Plan

3% of every transaction is allocated to the marketing wallet. So we can fuel the most ambitious project and reward our active community.

3% Auto Growing Liquidity

ScorpFin has an automatic liquidity pool algorithm (AutoLP) in its token contract with each trade, the underlying liquidity automatically grows 3%. This means a stronger token and less volatility.

Special Features:

*Hold Minimum of 50000 ScorpFin tokens to earn dual\ rewards
Sells are restricted to 0.2% of total supply for 24Hrs for each wallet.
No wallet will be able to hold more than 3% of the total supply.

ScorpJackpot Giveaway

Time to get lucky ScorpFin Family

3% of total supply shall be given away as rewards from time to time. Details on the conditions shall be made known as events unfold.

Disclaimer

* This giveaways are Subject to changes

* More terms and conditions will be updated soon

Get Lucky everyone buy buy buy and hold hold!!!
